

**To:** IPA Contracted Providers  
**From:** Credentialing Department  
**Date:** December 26, 2017  
**Re:** **Gemini Diversified Services (GDS) Notice**

---

Network Medical Management delegates its initial and re-credentialing process to Gemini Diversified Services (GDS) to provide required primary source verifications for all IPA contracted practitioners. GDS is a 10-point NCQA accredited Credentialing Verification Organization (CVO) with extensive credentialing experience and is committed to maintaining up-to-date regulatory requirements, health plan standards, CMS changes, and NCQA criteria.

GDS reaches out to each individual practitioner six months prior to the re-credentialing due date with a pre-populated re-credentialed application to facilitate the process and will contact the practitioner with any questions pertaining the application. We take every precaution, utilizing state of the art technology to ensure our network is secure, reliable, and protected.

Working together, Network Medical Management and Gemini Diversified Services assures that each practitioner undergoes a stringent credentialing process to ensure that the **Golden Shore Medical Group** network is comprised of competent, well trained practitioners to promote the highest quality medical care practitioners to our members.

For additional information regarding our credentialing process, please email us at [Credentialing.Dept@nmm.cc](mailto:Credentialing.Dept@nmm.cc).
